

Cosmic Master Reset Timeline – Updated with Jericho

This updated Cosmic Master Reset Timeline integrates geological, cosmic, and civilizational collapse events recalibrated with the Antikythera cosmic clock. It includes the Jericho destruction (burned city) as one of the earliest urban reset markers. Patterns show collapses every 400–600 years, with smaller pandemic/war resets every 80–100 years. The future reset window is projected for the 2030s–2040s.
