

# Enoch Zero Clock Manual — Jesus Timeline Verification

---

This document provides a step-by-step manual for using the Enoch Zero Clock (reset 3114 BCE, 988-year cycles) to verify the birth and death of Jesus Christ based on biblical references, astronomical alignments, and historical evidence. The Bible does not provide exact calendar dates, but its contextual clues match real astronomical phenomena that can be tracked with the clock.

## Operator’s Manual

- 1. Initialize the Clock
  - Set zero point to 3114 BCE.
  - Engage the 988-year cycle gear.
  - Resets: 2126 BCE, 1138 BCE, 150 BCE, 838 CE.
  - Jesus’ lifetime falls just after the 3rd reset (150 BCE).
- 2. Verify Birth
  - Rotate crank to years 7 BCE → 2 BCE.
  - Watch planetary markers.
  - Key alignment: Sept 11, 3 BCE (Sun in Virgo, Moon at her feet, Jupiter rising).
  - Matches Revelation 12 imagery and Herod’s reign.
- 3. Verify Death
  - Rotate gears to Passover (Nisan 14 full moon).
  - Narrow to Pilate’s rule (26–36 CE).
  - Eclipse marker shows April 3, 33 CE (lunar eclipse visible in Jerusalem).
  - Matches biblical description of darkness and blood moon.
- 4. Verification Triangle
  - Birth: Sun (Virgo), Moon (feet), Jupiter (king star).
  - Death: Sun (darkness), Moon (blood), Earth alignment (Passover full moon).
  - Events confirmed when triangle alignment appears on dial.
