

Cosmic Migration Timeline (Atlantis to 2040)

This document traces human migration patterns from the legendary Atlantis to projected movements through 2040, recalibrated with the Antikythera cosmic clock. Each migration event is linked to cosmic influences (meteors, volcanoes, floods, solar cycles) that triggered abandonment and resettlement.

| Era / Civilization | Gregorian Timeline | Antikythera Recalibration | Reason for Migration | Migration Path |
|---------------------|--------------------|---------------------------|--|---|
| Atlantis | c. 9600 BCE | c. 9620 BCE | Flood & submergence (cosmic oceanic resonance) | Spread into Egypt, Mediterranean, Mesoamerica |
| Göbekli Tepe | 9600–8000 BCE | 9620–8020 BCE | Climatic shifts after Younger Dryas | Into Fertile Crescent & Anatolia settlements |
| Sumer / Mesopotamia | 4500–1900 BCE | 4520–1920 BCE | River drying, warfare | Spread into Babylon, Persia, Indus Valley |
| Indus Valley | 3300–1300 BCE | 3320–1320 BCE | Floods + tectonic shifts | Migrated into India & Persia |
| Maya | 2000 BCE – 1500 CE | 2020 BCE – 1520 CE | Droughts + cosmic cycles | Into Mexico highlands, scattered Mesoamerica |
| Rome | 753 BCE – 476 CE | 773 BCE – 486 CE | Invasions, plagues, political collapse | Into Europe, Byzantium |
| Native Americans | 1492 CE collapse | 1502 CE collapse | European contact + cosmic solar cycles | Mass depopulation, survivors migrated west |
